## Education

---

**Cornell University** / expected May 2020  
B.A. in Computer Science & French  
Cumulative GPA: 3.84

### Relevant Coursework

Object-Oriented Programming & Data Structures

Computing Using Python

Design & Programming for the Web

iOS Development

Crowdsourcing & Human Computation

Computational Sustainability

## Experience

---

**GlaxoSmithKline** / June 2018 - August 2018

Software Developer Intern, Tech Platforms

- Conceptualized, designed, and created a web and mobile Chrome app as a central technology hub for over 100,000 company employees to contain their work calendar events, tasks, messages, etc. in one location
- Developed and launched an autonomous bot and bot manager platform for the Facebook Workplace app using the botkit framework, in Node.js and jQuery
- Contributed to the design of the Marketplace as a platform for software developers to collaborate and share resources such as code, design guidelines, and protocols
- Executed the Continuous Integration - Continuous Delivery pipeline through setting up intermediaries such as Jenkins and enabling the Transport Layer Security protocol

**Cornell University Sustainable Design (CUSD)** / September 2017 - Present

Currents Team CS Lead, Software Developer

- Collaborated with the other teams to create an application that controls the HVAC systems of rooms and laboratories on campus for optimal energy usage
- Managed the Computer Science team in the development of the iOS Application, prediction algorithm, and server
- Implemented the server through which all of the data used in the prediction algorithm is processed then outputted to a microcontroller for the HVAC system, using Node.js
- Conceptualized, designed, and implemented a new centralized active member and alumni database for hundreds of present and past CUSD members to use, using Sketch, Node.js, HTML, and CSS
- Specialized in backend website development for the database and implemented features such as file uploads, data storage, and data retrieval using Google Firebase

**The Research Paper** / August 2017 - Present

Design Team Lead

- Designed the entirety of the content for The Research Paper, the largest undergraduate research magazine at Cornell
- Organized the design team through team meetings and created centralized layouts for members to apply, using Adobe InDesign, Photoshop, and Illustrator

**Web Design & Programming Teaching Assistant** / August 2018 - Present

- Led a weekly lab for 20-30 students and taught them principles of web design using HTML, CSS, and JavaScript
- Assisted students in understanding course material through office hours and online Discourse posts

## Skills & Interests

---

**Programming** Python / Java

**Web Development** Javascript / HTML / CSS / SQLite / MongoDB / PHP

**Craft** Sketch / Adobe Creative Suite

**Languages** Chinese / French
